PACK SIZES (PACKET)

1 kg

BENEFITS

01 Supports metabolic health and recovery

02 Restores and maintains optimal body condition

03 Prepares cows for the next lactation cycle

04 Reduces the risk of metabolic disorders

ABOUT FAMAS DRY COW

FAMAS Dry Cow is developed to meet the unique nutritional needs of cows entering the dry period. This supplement offers a well-balanced mix of essential nutrients that aid in recovery, help restore optimal body condition, and prepare cows for the next lactation cycle. By maintaining metabolic balance and supporting bone health, FAMAS Dry Cow ensures that cows transition smoothly, reducing the risk of metabolic disorders and setting the stage for a successful subsequent lactation.

HOW TO USE

Incorporate into the daily feed during the dry period as per the recommended dosage. For best results, consult with a nutritionist to tailor the feeding regimen to your herd's specific needs.

Ask for FAMAS at any Agrovet near you

Bulk orders delivered to shops, farms and dairy cooperatives.

Use at the recommended dosage, as directed by a veterinarian or animal nutritionist.
